

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

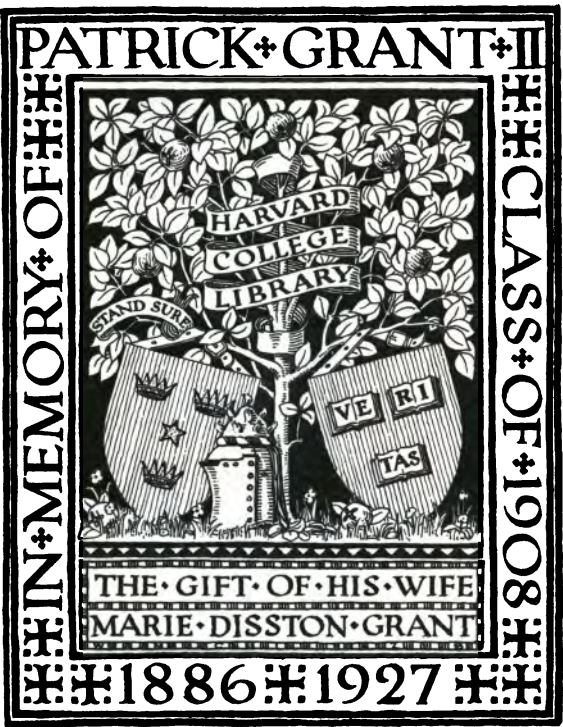

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### **About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. **Fire Department.**

---

The Fire Department was created by an Ordinance of the city, under the provisions of a special act of the Legislature. It consists of a Chief Engineer, four Assistant Engineers and ten Fire Companies. One of these Companies has charge of the Hooks and Ladders; the others are connected with the Engines. The number attached to each Company, and the annual compensation, are determined by the City Council. The appointments are made by the Mayor and Aldermen, and are annually revised. The Engineers are chosen annually in the month of January, by the City Council in convention. They are organized as a Board and have a Clerk who records the proceedings. A *red staff* is their distinguishing badge. They have all the power

of Firewards, on matters relating to the destruction of buildings by powder or otherwise. Their salaries are fixed by the Council, and are as follows: Chief, \$150; Assistants, \$50 each. The Clerk is allowed \$50. The Companies have each a Foreman, First and Second Assistant Foreman and Clerk, chosen annually by the members, subject to the approval of the Engineers.

The number of men attached to the respective Companies, and their compensation, are as follows:

Names and Nos. of Engines.	No. of Men.	Yearly Pay.
Citizen, No. 2,	22	6.00
Ohio, No. 3,	85	25.00
Acushnet, No. 4,	80	10.00

A small additional compensation is allowed the Foreman, generally \$5 yearly.

The Board of Engineers designate the Engines and Companies who may leave the city when a fire shall occur in the vicinity. Others may leave on special permission of an Engineer.

### Localities of Interest in and about the City.

---

*Acushnet.* This is a village usually known as the Head of the River, about three and a half miles in a northerly direction from the City Hall. The westerly part is in New Bedford and the easterly part in Fairhaven, divided by the Acushnet river. The parts are united by a stone bridge. In the New Bedford portion there is a public school-house, and No. 2 engine is stationed there. Pine Grove Cemetery is near the village.

*Acushnet River.* This makes the harbor of New Bedford, and separates the city from Fairhaven as far north as the stone bridge at the Head of the River.

*Acushnet Heights.* That portion of our territory known by this name is in the north-west part of the city, commencing at the head of Willis street. Here are some of the most beautiful private residences of our city; and the view, which includes the river, the har-

bor, the bay, and adjoining shores, villages and islands, is one of the finest in the country.

*Belville.* This name was many years ago given to a spot on the bank of the Acushnet River, about one mile south of Acushnet Village. A public school-house is situated on Acushnet Avenue near this locality.

*Cannonville.* A portion of the westerly part of the city, in the neighborhood of the meeting-house on the Smith Mills road, is known by this name, thus called in honor of one of our citizens whose labors in behalf of the people there will long be remembered.

*City Common.* This beautiful spot is in the north part of the city, and is bounded by County, Purchase, Pope and Pearl streets.

*Clark's Point.* This point forms the southerly part of the city. It has the waters of the river on the east and of Clark's Cove on the west. Its length is about two miles. At its southern extremity is a large tract of land belonging to the United States, most of which has been recently purchased. On the river side, at the extremity of the point, is a light-house, west of which the government have it in contemplation to erect an extensive fortification. Around this point, a distance of about four and a half miles, is a road not surpassed, if equalled, by any public drive in this country. It commences at Cove street, near the Orphans' Home, and follows the shore from thence along the western, southern and eastern boundaries of the point, until it terminates in the street where it has its beginning. It is eighty feet wide, smooth and level, and in its course commands a series of views of surpassing loveliness and beauty. The cove, the bay and the river, the shores, the islands and ledges, the light-houses, steamers, and sailing craft of every description, the city on the one side, its sister town of Fairhaven on the other, the noble bridge between, and the forest-like show made by the shipping of both, constitute a series of pictures which renders a ride or a walk over this road most delightful and attractive.

*Fish Island.* This island, once but little more than a sand-bank, is now a place of a large business. The bridge from the city to Fairhaven passes over it. Several wharves, an extensive coal-yard, an oil-factory and a marine railway are connected with it.

*Four Corners.* The space formed by the intersection of Water and Union Streets. This has been a somewhat noted spot in our local history. Near this was erected the first *village house*, and it may still be regarded as a business centre. The Banks, Insurance Offices, Lawyers' Offices, &c., are nearly all in this vicinity. William A. Wall's picture of the *Four Corners Fifty Years Ago* is beautiful and correct.

*Haskins' Corner* is about one mile north of Cannonville on the Noel Taber Road.

*Pope's Island.* This island derives its name from a family long known and respected among us, a member of which now resides upon it. The bridge between the city and Fairhaven passes over it. It lies nearly in the centre of the river.

*Palmer's Island,* upon which the United States government has a light-house, is at the mouth of the inner harbor. The main channel lies east of it. It affords a good protection from the high southerly winds. A house of entertainment is kept upon it.

*Rotch's Square.* Near the river on Front street. Hamilton and Rodman streets have their easterly termination in this Square.

## MORGAN STREET SCHOOL FOR GIRLS.

Edward A. H. Allen, *Principal*.  
Miss Sophia Shepherd, Miss Elvira Johnson, *Assistants*.

This excellent school is held in the new school-house erected by the Trustees in 1856. For elegance of finish, admirable arrangement, and its many modern improvements and conveniences, this is probably second to no school-house in the country. The

## ACADEMY SCHOOL FOR BOYS

occupies the old Academy building, entrance on Elm street.

T. Prentiss Allen, A. M., *Principal*. Edwin Seaver, *Assistant*.

Both these schools enjoy the advantages of the extensive apparatus and library of the Academy. Each has ample and attractive grounds, inviting to healthful exercise, while the extended experience, high character and liberal culture of both Principals and Assistants combine to place these schools in the highest class.\*

In the one boys are fitted for the university or for business lives; in the other young ladies can obtain the varied accomplishments and solid acquirements that prepare them for cultivated society or the domestic fireside.

## PIERIAN HALL SCHOOL.

Abner J. Phipps, A. M., *Principal*.  
Edmund T. Allen, A. B., *Assistant*.

In this school the two sexes are educated together, which is not only the more natural course, but is found to be more beneficial in its moral and literary influences than their separate education.

Instruction is given in all the branches usually taught in the higher class of private schools. There are two entrances, one from Union street for the young ladies, the other from Fifth street for the boys. The school-room is spacious, well lighted, and thoroughly ventilated. The location is central, and the rooms well adapted to meet the wants of such a school.

## SEARS' HALL SCHOOL. Entrance on Cheapside.

Amasa L. Gleason, A. M., *Principal*.

A school for both sexes. Instruction is given in the common English branches, the Natural Sciences, the higher departments of Mathematics, and the Languages.

\*By an arrangement between the teachers of these schools an exchange of services is effected, which, without detriment to the discipline of either, gives to the scholars of each the advantages of variety and a much larger body of instructors.

## BENEVOLENT AGENCY.

One of our most useful charitable agencies is that which is sustained mainly by individuals connected with the First Congregational Society. The Rev. Moses G. Thomas has the direction of the means thus obtained. For many years his labors have sought out and relieved the sick, the sorrowing and the destitute. Once a year, at a public meeting at the Church of the First Congregational Society, he has given an account of his ministry of mercy. Few instrumentalities among us have done more than this to discountenance and put down the importunate street-beggar, and to extend assistance to that suffering and destitution which is obscure and uncomplaining.
